NOTES:

1. This list of Rail Train gondolas seems comprehensive, but there may be some numbers missing.
2. The Rail Train gondolas were not assigned work numbers, but renumbered among regular freight gons in EL series (12500-12999). Their former DL&W numbers can be determined by removing the first two digits (12) and inserting (68).
3. All Rail Train gondolas were renumbered in April 1964 and equipped with bulkheads, supports etc. by September 1964. The work was performed at Erie Lackawanna's Meadville Program Car Shop. -- *Mike Oravec*
